PROJECTS

- | | |
|----|---|
| I | <p>INSIGHT ON HUMAN ACTIVITY RECOGNITION USING DEEP LEARNING APPROACHS (Dec 2023 - Apr 2024)</p> <p>Humans naturally perceive and recognize faces and emotions. Emotion recognition enhances security and enables card less transactions. It aids in identifying criminals and providing specialized treatments. Face detection and emotion recognition are key research topics. Open-source projects are gaining more significance over licensed ones. Python libraries can be used for face detection and recognition. Kaggle offers open-source FER datasets for research. These datasets classify emotions into seven types: happy, sad, fear, disgust, angry, neutral, and surprise.</p> <p>Skills used - Python, OpenCV, Flask micro web framework.</p> |
| II | <p>MAKE MY TRIP (Nov 2024)</p> <p>Automating the Homestays and Villas module on the MakeMyTrip (MMT) webpage involves streamlining the functionalities associated with booking,</p> |

managing, and displaying homestay and villa options. This automation improves the user experience by enhancing the efficiency of operations, ensuring accuracy, and reducing manual intervention.
